USE THIS BOX

Abstracts should be submitted by the presenting author only and must be written in English. You may use standard word processor formatting such as italics, underlined, super- and subscript, as well as special characters (including Greek letters).

Title

The title must start in uppercase and continue in lowercase, except for conventional terms. Use bold characters.

Authorship

If more than one author, underline your name (the presenting author, in whatever position you appear in the author list) and use commas to separate the names; do not use 'and' before the last author.
Write first name(s) as initials and surname in full.
If more than one affiliation, use sequential superscript numbers to identify each institution.

Text

Keep the abstract text to **within 4000 characters, spaces included** (this is roughly equivalent to 500 words). Use Times 12.
